Education

2026 - Present - University Of Abra - Main Campus

A specialization focused on the design, development, and maintenance of websites and web applications using front-end and back-end technologies. The program covers HTML, CSS, JavaScript, frameworks, databases, server-side programming, and web security, preparing students to build responsive, dynamic, and user-centered web solutions.

Work Experience

Tokiwa Subic Corporation | Olongapo Central

Luzon Philippines

Production Operator | Jan.2017 - Apr.2023

- Operated production machines used in the molding, assembling, and finishing of makeup cases
- Assembled makeup case components such as shells, hinges, mirrors, and closures according to quality standards
- Performed visual and manual inspection to ensure products were free from defects
- Followed production schedules and met daily output targets
- Maintained cleanliness and organization of the work area in compliance with safety rules
- Assisted in packaging, labeling, and preparing finished products for shipment
- Reported machine issues or product defects to supervisors
- Followed company policies on safety, quality control, and proper handling of materials
