TRISHA MAE B. GAPUZ

IT STUDENT | ASPIRING FRONTEND DEVELOPER

09953683347 | trishamaebobiles@gmail.com | Lagangilang, Abra | www.trishamaegapuz.online

PROFESSIONAL SUMMARY

Information Technology student and aspiring frontend developer with hands-on experience building academic and personal web projects. Familiar with React, JavaScript, HTML, CSS, Node.js, Express, and PostgreSQL, with an interest in creating clear, responsive, and user-friendly interfaces. Currently developing a Budget Monitoring and Allocation System (BMAS) capstone project, including role-based access, budget registry workflows, and reporting features. Eager to apply technical skills, learn from an experienced team, and contribute to practical software development projects.

EDUCATION

Bachelor of Science In Information Technology | University of Abra

2024 – Present

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3, Vite, responsive UI development

Backend & Database: Node.js, Express.js, PostgreSQL, REST API integration

Tools & Deployment: Git, GitHub, VS Code, pgAdmin, Neon, Render, Vercel

Other: Role-based access control, form validation, dashboard and report interfaces, debugging

PROJECTS

Budget Monitoring and Allocation System (BMAS) — Capstone Project | React, Node.js, Express.js, PostgreSQL

- Developing a web-based system to support budget proposal management, fund allocation, registry tracking, and reporting workflows.
- Working with modules including Dashboard, Budget Proposals, IGP Registry, RBUD Registry, and RAOD Registry.
- Implementing role-based access and improving consistency of forms, tables, navigation, and report layouts.
- Deploying the frontend, backend, and database using Vercel, Render, and Neon.

ReUse Connect | React

- Created a web application concept focused on connecting users with reuse-oriented activities and resources.
- Designed interface components and page layouts with an emphasis on usability and clear navigation.

E-Commerce / Food Ordering Website | Web Development

- Built a website prototype for browsing items and supporting an ordering workflow.
- Worked on user-facing pages and interface flow for a straightforward customer experience.

To-Do List Application | HTML, CSS, JavaScript

- Created a task-list application to practice interactive frontend behavior and basic task organization.

CERTIFICATES & TRAINING

- Apply AI: Analyze Customer Reviews — Cisco Networking Academy
- Artificial Intelligence Fundamentals — IBM SkillsBuild
- AI Fundamentals with IBM SkillsBuild — Cisco Networking Academy in collaboration with IBM
- Cybersecurity and Cloud Fundamentals 1.0 — Fortinet Training Institute
- Security Operations Fundamentals — Palo Alto Networks

RELEVANT STRENGTHS

- Problem-solving and debugging
- Willingness to learn new tools and technologies
- Attention to interface consistency and user experience
- Collaborating on academic and project-based work
