

Trisha Mae B. Gapuz

FRONTEND DEVELOPER

09943303851 | Lagangilang, Abra

trishamaebobiles@gmail.com

Information Technology student and aspiring frontend developer with hands-on experience building academic and personal web projects. Familiar with React, JavaScript, HTML, CSS, Node.js, Express, and Postgresql, with an interest in creating clear, responsive, and user-friendly interfaces. Currently developing a Budget Monitoring and Allocation System (BMAS) capstone project including role based access, budget registry workflows, and reporting feature. Eager to apply technical skills, learn from an experienced team, and contribute to practical software development projects.

Bachelor of Science In Information Technology
University of Abra
2024 - Present

Projects

Budget Monitoring and Allocation System (BMAS)

Capstone Project | React, Node.js, Express.js, PostgreSQL

- Developing a web-based system for budget proposal management, fund allocation, registry tracking, and reporting workflows.
- Working with Dashboard, Budget Proposals, IGP Registry, RBUD Registry, and RAOD Registry modules.
- Implementing role-based access and improving forms, tables, navigation, and report layouts.
- Deploying frontend, backend, and database using Vercel, Render, and Neon.

ReUseConnect

React

- Created a web application concept focused on connecting users with reuse-oriented activities and resources.
- Designed interface components and page layouts with an emphasis on usability and clear navigation.

E-Commerce / Food Ordering

Web Development

- Built a website prototype for browsing items and supporting an ordering workflow.
- Worked on user-facing pages and interface flow for a straightforward customer experience.

Certificates & Trainings

- Apply AI: Analyze Customer Reviews - Cisco Networking Academy
- Artificial Intelligence Fundamentals - IBM Skills Build
- AI Fundamentals with IBM SkillsBuild - Cisco Networking Academy in collaboration with IBM
- Cybersecurity and Cloud Fundamentals 1.0 - Fortinet Training Institute
- Security Operations Fundamentals - Palo Alto Networks

Technical Skills

- React JavaScript
- HTML5, CSS3, Vite
- Node.js, Express.js
- PostgreSQL. REST APIs
- Git, Github. Vs Code
- pgAdmin, Neon, Render, Vercel
- Role-based access, form validation
- Debugging responsive UI

Relevant Strength

- Problem-solving and debugging
- Willingness to learn
- Attention to UI consistency and user experience
- Project-based collaboration
